Performance characterization of Novel Organic/Silicon Solar Cells

A Thesis Submitted to Faculty of Science-Ain Shams University in partial fulfillment for The Degree of Master of Science (M.Sc.) in Physics

By

Asmaa Mohamed AbdelHafiz Aly

B.Sc. in Physics - Faculty of Science- Ain Shams University-2016

Supervised by

Prof. Dr. Ashraf Shamseldin Yahia

Professor of electronics and electromagnetics, Physics Dept., Faculty of science, Ain Shams University

Prof Dr. Mohamed Farahat Othman

Professor of Photonics, Mathematics and Engineering Physics Dept., Faculty of Engineering, El Mansoura University

Dr. Mohamed Hussein Abd El-Razik

Lecturer of physics, Physics Dept., Faculty of science, Ain Shams University.

Physics Department
Faculty of Science
Ain Shams University

(2021)

APPROVAL SHEET

Performance characterization of Novel Organic/Silicon Solar Cells

By

Asmaa Mohamed AbdelHafiz Aly

Performance characterization of Novel Organic/Silicon Solar Cells

Name: Asmaa Mohamed AbdelHafiz Aly

Degree: M.Sc.

Department: Physics

Faculty: Science

University: Ain Shams University

Graduation Date: 2016 - Ain Shams University

Registration Date: 14/5/2019

Grant Date: 2021

Abstract ..... **III**

List of Publications ..... **V**

List of Symbols ..... **VI**

List of Abbreviations ..... **VIII**

List of Figures ..... **IX**

List of Table ..... **XIV**

Chapter 1 Introduction **3**

1.1 Solar spectrum **4**

1.1.1 Air Mass **5**

1.2 Solar Energy Conversion Technologies **7**

1.3 Solar Cell Development **8**

1.3.1 First-generation **8**

1.3.2 Second-generation **9**

1.3.3 Third-generation **10**

1.4 Thesis objective
……..... **11**
1.5 Thesis outline
……..... **12**
Chapter 2 Crystalline silicon solar cells **14**
……..... **2.1 Introduction**
……..... **16**
2.2 Basic Materials of Solar Cells
……..... **17**
2.2.1 Essential Properties of Semiconductor Materials
……..... **17**
2.2.2 Intrinsic Semiconductor
……..... **20**
2.2.3 Doping of semiconductors
……..... **20**
2.3 Absorption of the light
……..... **21**
2.4 Generation Rate
……..... **22**
2.5 Recombination Rate
……..... **22**
2.6 Charge Transport
…… **24**
2.7 Fundamental equations of the semiconductor devices
……..... **25**
2.8 Formation of the p-n junction
……..... **26**
2.9 The Dark behavior of the p-n junction
……..... **29**
2.10 The illumination behavior of the p-n junction
……..... **30**
2.11 The equivalent circuit of the solar cell
……..... **31**
2.11.1 Ideal solar cell circuit
……..... **31**

2.11.2 The realistic solar cell model
…….... 32
2.12 Shockley-Queasier limit.
…….... 33
2.13 The solar cell characteristics
…….... 34
2.14 Loss mechanisms
…….... 36
2.15 Thin-Film Solar Cells (TFSC)
…….... 38
2.16 Light trapping in solar cell
…….... 39
2.17 Summary
…….... 40
Chapter 3 Organic solar cell
…….... 43
3.1 Introduction
…….... 43
3.2 Structure of Organic solar cell
…….... 44
3.3 Organic solar cell operation principles
…….... 45
3.4 Observations on OSCs from a physical perspective
…….... 46
3.5 Organic Solar Cell material
…….... 48
3.5.1 Organic semiconductor
…….... 48
3.5.2 Material of the active layer
…….... 48
3.5.3 Material of the hole transport layer (HTL)
…….... 50
3.5.4 Material of the electron transport layer (ETL)
…….... 51
3.6 Organic Solar Cell Architectures
…….... 51
3.7 Challenges and Opportunities in Organic Solar Cells
…….... 55
3.8 The difference between organic and inorganic solar cell
…….... 56
3.9 Summery
…….... 57

Chapter 4 Computational Technique
…….... **60**
4.1 Introduction
…….... **60**
4.2 Overview of numerical methods for highly efficient Thin Film Solar Cells
…….... **60**
4.3 Introduction to FDTD method
…….... **61**
4.4 Advantages of FDTD method
…….... **62**
4.5 Overview of FDTD method
…….... **63**
4.6 Frequency - dependent materials in FDTD Method
…….... **66**
4.7 Boundary conditions
…….... **69**
4.7.1 Periodic boundary conditions (PBCs)
…….... **69**
4.7.2 Perfectly matched layers (PML)
…….... **70**
4.8 Lumerical FDTD solutions
…….... **70**
4.9 How to avoid the divergence in FDTD simulation?
…….... **71**
4.9.1 D_t stability
…….... **71**
4.9.2 PML considerations
…….... **72**
4.10 The Electrical Simulator
…….... **73**
4.11 Summary
…….... **75**
Chapter 5 Results of Highly Efficient Grating Thin Film Solar Cell
…….... **78**
5.1 Introduction
…….... **78**

5.2 Optical and electrical simulation strategy
……..... **80**
5.3 Results and discussion
……..... **84**
5.3.1 Optical analysis
……..... **84**
5.3.2 Electrical analysis
……..... **95**
5.4 Result of Research work in organic solar cell
……..... **104**
5.5 Summary
……..... **105**
Chapter 6 Conclusions and future work
……..... **108**
6.1 Conclusions
……..... **108**
6.2 Future work
……..... **109**

Acknowledgments

First, I wish to start by the name of Allah who is the most merciful and our prophet Muhammad peace upon him. I must declare that without the support of Allah I were not to be here, it is only Allah mercies that made me finish this thesis, and Allah let me know good people to whom my regards must go.

I would like to express my thanks to all professors and colleagues who contributed to the work presented in this thesis.

I am deeply grateful to Prof. Dr. Ashraf Shamseldin Yahia, Professor of Electronics, Physics Department, Faculty of Science, Ain Shams University, whose supervision, encouragement, guidance, and support, from the start to the end, enabled me to develop a thorough understanding of this thesis. Throughout this study, he has constantly addressed me with helpful advice and suggestions

I would like to thank Prof. Dr. Mohammed Farahat, Associate Professor at Nanotechnology Engineering Program, University of Science and Technology, Zewail City of Science and Technology and ASSOC Professor at Mathematics and Engineering Physics Department, Faculty of Engineering, Mansoura University for suggesting a novel and excellent point of research along with his continuous encouragement, valuable and abundant discussions throughout this work.

I would like to express my deep gratitude to Dr. Mohamed Hussien, Assistant Professor of photonics at Zewail City of Science and Technology as well as at Department of Physics, Faculty of Science, Ain Shams University, for his continuous and invaluable guidance. His
